

# Lumnia Compact

One of the most energy efficient  
insect light traps in the market

**Rentokil**

# One of the most energy efficient insect light traps in the market.

The latest addition to Rentokil's Lumnia range, the Lumnia Compact is a highly effective unit with one of the lower energy consumptions in the market.

The unit has been designed for relatively low risk areas, within food retail operations, allowing for wall mounted or flat surface installation.

Within the unit's modern exterior lies a powerful 11W LED offering high attraction for flying insects while having a very low energy consumption.

By trapping the insects, Lumnia Compact avoids the problems of insect fragments that can occur when using traditional fly killer units.

- Highly effective - eliminates the nuisance caused by flying insects.
- Discreet, unobtrusive design - can be used in public areas.
- Safe and hygienic - no pesticides or flying insect fragments.
- Provides peace of mind - fulfils legal and health & safety requirements.
- Adaptable - can be wall mounted or sited on a flat surface, using an additional bracket.

## Why Rentokil?

Rentokil is the global leader in pest control, bringing expert, reliable and professional service to commercial and residential customers in over 60 countries worldwide.
